Junaid Ahmed

Frontend Developer (React.js)

Address: Karachi, Pakistan | **Mobile No:** +923123237006 | **Email:** junaidahmedyt8@gmail.com | **Github:** https://github.com/thejunaidahmed/

Linkedin: https://www.linkedin.com/in/junaid-ahmed-143b50296/

PROFESSIONAL SUMMARY

Web developer with expertise in HTML, CSS, Tailwind CSS, JavaScript, TypeScript, React, Next.js, Node.js, and Express.js. Skilled in building and integrating REST APIs and managing databases with MongoDB. Implements authentication strategies and form validation using React Hook Form and Zod. Strong version control practices with Git and GitHub, committed to delivering high-quality web applications.

SKILLS

- **Frontend:** HTML5, CSS3, Tailwind CSS, JavaScript (ES6+), TypeScript, React.js, Next.js
- **Backend:** Node.js, Express.js, RESTful APIs, Authentication & Authorization
- **Database:** MongoDB, Mongoose
- **State Management & Forms:** Redux Toolkit, React Hook Form, Zod Validation
- **Tools & Deployment:** Git, GitHub, VS Code, Cursor, Netlify

TECHNICAL PROJECTS

Frontend E-Commerce (React.js)

- Developed an e-commerce platform using React, Redux Toolkit, and Netlify, implementing features such as product catalog, shopping cart, and checkout system. Improved responsive design and enhanced overall user experience. Integrated state management and optimized component performance for smoother user interactions.
- Live Project: https://lnkd.in/dMAYnV55

Frontend TheMobileMarket (React.js)

- Developed a mobile phone listing web application by organizing device data from multiple brands. Implemented search and filtering based on specifications (RAM, storage, camera, battery) and built a responsive UI using React. Deployed the application on Netlify.
- Live Project: https://lnkd.in/dqs29mRg

Frontend Food App (React.js)

- Developed a food delivery application using React and Redux Toolkit, implementing features such as food ordering and category-based browsing. Ensured responsive design and supported deployment on Netlify for better performance and accessibility.
- Live Project: https://lnkd.in/d3sV__6p

Authentication System (MERN)

- Built a secure MERN authentication system using Node.js, Express.js, MongoDB, React, and TypeScript with JWT and bcrypt for password security. It includes core features like user login, signup, logout, and profile image upload. Protected routes ensure only authenticated users can access sensitive parts of the application.

EDUCATION

08/2023 - 05/2027 **Bachelor**: **Software Engineering** (7th Semester)
Mehran University of Engineering and Technology - Jamshoro
Relevant Coursework: Web Development, Database System, Software Engineering

CERTIFICATIONS

- **Google AI Essentials - Coursera**
Certificate: https://drive.google.com/file/d/1apRm63v9UtIeBLNEq_goIQCuVhWiRdxt/view?usp=sharing

- **NASA Hackathon - Built Weather App with React.js**
Certificate: https://drive.google.com/file/d/1k1QdbF42ZQmE66htHeDbHQ01sR5Ob2-B/view?usp=sharing
